Subject: FW: PFAS Places of Interest - EPA-wide Combined List Data Model and FAQ

Hi Ryan,

See the email below as well as the most recent one copied here: (note it seems like they are asking me to coordinate with the regions to ask them to update data. This was not my understanding.)

Hi Hannah,

Following up on my last email, attached is the existing file that ERG put together from what you most recently sent. Please take a look and let me know if you have any questions. All rows that were identified in Linda Gaines' file were taken out of this so that you can specifically request the data be filled in for this smaller subset. I did a quick browse of them and it seems like there will be some decisions needed on what to name each area, and where to locate a dot on the map. When you send out the data request, please include the FAQ and data standard doc for reference. Thanks.

Hi Hannah,

Unless there is some need to do it differently, we were hoping specifically that you could send out the data (we are putting what you sent us in the new data model) and send it out to the data stewards/providers that you have worked with in the past – asking that they fill in the cells to the extent possible. In the case of OLEM, they plan to consolidate the responses into one sheet that they will send us. If you prefer to review what was turned in by each Region and forward those separately, I assume that Alex (along with the contractor) could piece everything together. I don't want to speak for him, so I copied him here. We could have a short call to discuss other options if you want to. Generally, I think you would evaluate the info submitted to be sure there are not things that your office didn't think was written correctly for public consumption.

Mike

Subject: RE: PFAS Places of Interest - EPA-wide Combined List Data Model and FAQ

Hi Mike,

Can you clarify what is being asked for the data steward? I assume this is more of a POC for issues and not asking the data stewards to be involved in data compilation, cleaning, management, etc.

Thanks
Hannah

Subject: PFAS Places of Interest - EPA-wide Combined List Data Model and FAQ

Thanks to all that provided comments on our previous versions of the PFAS Places of Interest Data Model. Alex Montilla and I have finalized the version that can be used for collection of data for the public data release. We are asking that each national data steward provide the attached FAQ and data model to their Regional data providers. The deadlines noted below are also in the FAQ. For national data stewards that will make the data requests, please build in some time when asking for the data so that you can compile it into one Excel sheet by 11/27. Please see the attachments for more details. Alex Montilla is the primary point of contact for questions. Thanks.

Mike

FAQ Excerpt

What are the Deadlines for Developing the First National List?

11/1 – Data Standard Version 1.0 completed – programs can send data requests to data providers

11/27 – deadline for programs to finish compilation of lists to send ORD

12/6 – consolidated list added to National PFAS Data Explorer in draft format for internal review (and master excel sheet available)

12/17 – all changes to draft version completed and version 1 is completed
